

RAAF TOWNSVILLE

Airspace Infringement Hot Spots

Remain current with updated NOTAMs in order to operate within and around TVL CTA, CTR and Restricted Areas to avoid infringement. Due to the fluidity of military movements, NOTAMs are subject to change, sometimes at very short notice.

Pre-brief to understand the various common routes when transiting in/out of TVL CTR and CTA. When manoeuvring on these routes, be cognisant of the Class C airspace steps including an understanding of the distances and heights at which you will need clearance to operate.

Exercise caution when navigating to/from Magnetic Island. Keep clear of Class C airspace when instructed to remain OCTA whilst maintaining radio communication while waiting for further instruction.

Pre-brief R768's lateral confines and the respective airspace activation heights; R768A SFC-2000FT and R768B SFC-3000FT.
